Story Introduction

Goldilocks never made it far after thieving and fleeing the Bears’ home. A 911 call sent Forest Fuzz into an exhaustive, four-day pursuit, after which the infamous Goldilocks was hauled into court. As luck would have it, Papa Bear held the trial that very afternoon, sentencing the mischevious minor to six years in the slammer. Out five years and eleven months early on good behavior (for sleeping in the Warden’s bed), she’s out to live life once again and it’s up to you to help her taste it!

Given a fresh start at more mischief, Goldilocks is fervently pursued by the Bears who aren’t too happy that justice hasn’t been served. Hot on her tail, they’ve taken the law into their own paws and won’t stop until they’ve bagged her for life! To spice things up, the Forest Fuzz have gotten wind of the caper and are convinced it’s some hair-brained scheme to close their donut shop. On high alert, they begin their feverish pursuit of both Goldi and the Bears!

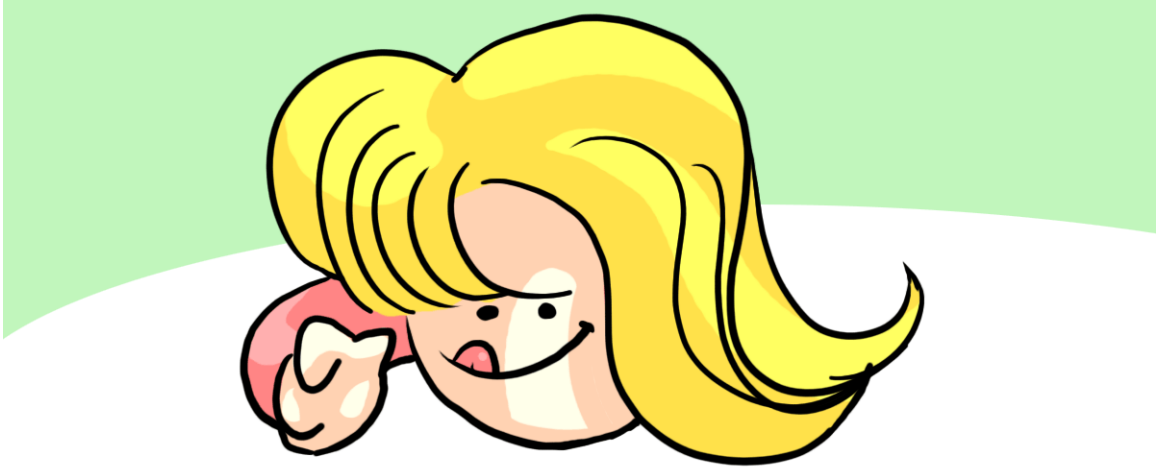

Game Overview

In the single player game, you play as Goldilocks or one of the Bears in this fast-action game of cat and mouse. Item placement and availability vary per game, so no two games are the same. Depending on the character chosen, the game is drastically different to play.

As Goldilocks, you want to visit as many homes and live as luxuriously as you can – on someone else’s dime! Get caught, and you’re done for. Your success depends on your ability to consume as quickly as you can – so hop and skip to it, Goldi! As one of the Bears, you’ll work with your family to find, catch and deal out justice to the intruder who’s caused you such grief (not to mention higher insurance rates). But don’t forget to look over your furry shoulder, those Forest Fuzz will catch you!

General World Description

Goldi's craving for candied chowder takes her through a spectrum of environments, seeking the next big breakfast left unattended. Careful not to be captured, she and the Bears'll make their way through all sorts of crazy places before they're done huffing it!

Woodland Way – Home to furry friends and foes alike, this world is filled with the shade of foliage above and provides streams, rockbeds, inclines and valleys full of trees to help mask scents, trails and the occasional fart.

Kooky Cottage town – The urban version of Woodland Way, the inhabitants commute to work 9-5 every weekday in the hopes of a better life. Little do they know that they'll take 2 steps backward once Goldi, the Bears and the Fuzz rolls through town!

Cagey Caves – Dark, mysterious and full of passageways, the Cagey Caves serve to disorient and make any claustrophobic anxious. Water torture, underground rivers, mineshafts and glowing crystals somehow offer an abundant amount of breakfast baked goods for our cast of characters.

Metro Mania – Eat your heart out Spiderman, this city is full of hustle, bustle and bad news for Goldilocks and her crew of pursuers. With porridge on every corner and hotels full of beds, no room is safe from the likes of this felon!

Magma Moors – Hot, steamy and full of celebrities the Papparazzi love to hound, the stakes are high with high-priced appetizers and private hot-springs with Goldi receiving an unexpected massage from an old friend!

Septic Space Station – Blown from a Volcano into outer space, Goldi and the crew find themselves trapped in garbage compactors bent on crushing Earth's monumental waste into tiny, bite-sized cubes of jettisoned waste. No porridge here, but the banana peels and half-eaten donuts should do!
